WORK EXPERIENCE

100Devs, Remote — Full-Stack Software Engineer

February 2023 - Present

- Collaborates with a team of engineers in all stages and all areas of the software development life cycle, including architecture design, code review, and internal tool management to assemble modern, responsive web applications.
- Utilizes coding best practices and agile methodologies such as Scrum.

Brivity, Bellingham, WA — Software Project Manager

February 2022 - February 2023

- Led an agile team of technicians through the development lifecycle of 200+ software applications for stakeholders.
- Maintained a living roadmap of each project, communicated progress to individual stakeholders, investigated and debugged errors, reduced errors via QA testing, initiated successful database imports, resolved design requests, oversaw CRM/CMA buildout and utilized Scrum best practices.

Opportunity Council, Bellingham, WA — Case Manager

November 2020 - February 2022

- Provided direct case management services to individuals and families experiencing homelessness/at risk of becoming homeless by assisting them in achieving housing stability.
