

Malaz Naquib

Software Engineer with a proven track record of building 200+ websites, CRMs, and CMAs for top real estate teams internationally. Deep interest in AI and machine learning. Seeking to bring my skills to an innovative tech company with global reach.

WORK EXPERIENCE

100Devs, Remote — Software Engineer

October 2022 - Present

- Collaborates with a dynamic team of engineers in all software development life cycle stages; taking ownership of architecture design, code review, and internal tool management to assemble modern, responsive web applications.
- Prioritizes the needs/preferences of end-users, ensuring modern, responsive, user-centric web applications.
- Leader in implementing coding best practices and agile methodologies such as Scrum on a cross-functional scale.

Brivity, Bellingham, WA — Software Project Manager

February 2022 - February 2023

- Mentored and led a high-performing agile team of engineers through a 100 million dollar Goldman Sachs investment and through the development lifecycle of 200+ software applications.
- Continuously sought optimizations in development processes, leading to a 23% increase in positive customer feedback.
- Upheld rigorous, high-quality standards by maintaining a living roadmap of each project, proactively communicating progress to individual stakeholders, performing in-depth QA testing, efficiently managing on-schedule database imports, resolving complex design requests with innovative solutions, and building out exemplary CRMs/CMAs.

Recent Projects:

Dreams of Modding (Fullstack Web App) – Users log in to communicate on planning, building, and bug-fixing open-source modding projects via posts. Once a post is made, other users may comment on the post to initiate collaboration. Users may also access extensive materials/tools for new and experienced modders alike to improve their skills.

Other Projects: NASA APOD Web App with NASA API integration, On-demand cocktail suggestion app with CocktailDB API integration, Dungeons and Dragons Spell Finder App, and many more
