WORK EXPERIENCE

100Devs, Remote — Software Engineer

October 2022 - Present

- Collaborates with a team of engineers in all stages of the software development life cycle, including architecture design, code review, and internal tool management to assemble modern, responsive web applications.
- Utilizes coding best practices and agile methodologies such as Scrum.

Brivity, Bellingham, WA — Software Project Manager

February 2022 - February 2023

- Led an agile team of engineers through a 100 million dollar Goldman Sachs investment and through the development lifecycle of 200+ software applications for stakeholders.
- Maintained a living roadmap of each project, communicated progress to individual stakeholders, performed QA, managed database imports, resolved design requests, and oversaw CRM/CMA buildout.

Opportunity Council, Bellingham, WA — Case Manager

November 2020 - February 2022

- Provided direct case management services to individuals and families experiencing homelessness/at risk of becoming homeless by assisting them in achieving housing stability.
